INTRODUCTION

This white paper outlines the investment opportunity into 24 diverse, well-planned, largescale businesses in the Kuruman ONE SMALL TOWN initiative, Northern Cape, South Africa.

This investment is in the form of cryptocurrency Investor Tokens called OSTX. 150 million OSTX have been minted and are on offer to investors. Each OSTX token represents a proportional share in 30% ownership of the 24 businesses specified below, under specific terms and conditions that are outlined in detail in the OSTX sales agreement.

OST INVESTOR TOKEN (OSTX)

Token Details:

Name:	OSTX (Investor Token)
Network:	CARDANO
Issued Tokens:	150,000,000
Price:	\$1.00 USD per token
Launch Date:	August 2022

INVESTOR REGISTRATION (XCHANGE & KYC)

Investors wanting to take part in the purchase of our tokens must register on our website to book tokens, on this page :

<https://www.onesmalltown.org/prelaunchtokenreserve>

After a successful KYC (Know Your Customer) process, investors will be able to exchange fiat currencies for our tokens via credit card or bank transfer payment.

At a later stage, our tokens will be available on a trading platform where the purchase will be automated and exchange between investors possible.

MOTIVATION FOR THE ONE SMALL TOWN INITIATIVE

The socio-economic structure of our countries and our world has failed us dramatically. The freedom that our forefathers strived for is in danger of being lost forever. Our socio-economic system is broken – It cannot be fixed. We are creating a new system – without any violence, opposition or conflict. A new system of prosperity and abundance for all – that will make the existing system obsolete.

We can no longer sit idly watching the destruction of our towns, our countries, our world, and the human potential. It has fallen on the shoulders of the common people to unite and create a new way, a new system, and a beautiful life for us and the next generations to come.

The Ubuntu movement has a simple plan; to turn small towns around the world into places of abundance and prosperity for all. A system in which there are no hurdles to progress or restrictions on personal growth individually or as a community.

Communities that support and promote unbridled creative expression in all areas of life such as arts, culture, science, technology, healthcare, environment, architecture, and especially agriculture. To create such harmonious communities, we, the people, must lead the Revolution of Consciousness by simply creating a new alternative way of living; connected through community living and common goals that benefit everyone.

This new conscious movement will turn competition into cooperation and collaboration where all members will benefit from the collective efforts, skills, and talents.

It all begins with ONE SMALL TOWN.

OUR INSPIRATION

“Ubuntu” is an African expression of ancient wisdom, which is echoed by all ancient civilizations. It simply means “unity within community” where everyone contributes their natural talents and skills for the greater good of all.

The Native American Cherokee have a similar philosophy that says; *“if it’s not good for everyone, it’s no good at all”*. This philosophy is one of the founding principles of our ONE SMALL TOWN system, which we call Contributionism.

Ubuntu Planet is a registered non-profit company, active since 2015, focused on developing new conscious communities called **“ONE SMALL TOWN”** which will serve as a blueprint for many other towns around the world. The objectives are simple and achievable by us working together.

ONE SMALL TOWN BLUEPRINT

The **“ONE SMALL TOWN”** strategy takes an entirely new approach towards reviving our towns, our lives, and economies. It is a community-driven structure presenting a viable economic model that benefits all participants. A model that unifies entire communities towards a common goal and fosters exponential economic growth potential. When implemented, it will result in community-focused, financially abundant towns with maximum employment and new levels of security for all its inhabitants.

The idea was born in 2005, developed and promoted by Michael Tellingner in many countries around the world for 17 years. As of June 2022, the **ONE SMALL TOWN** concept is in full implementation stage in the towns of Ras El Matn, Lebanon and Kuruman, South Africa. We expect this to create a domino effect across many countries, especially the USA, Canada, Brazil, Australia, UK, Ireland, several EU countries and all of Africa.

Since the press release in April 2022, we have had contact with hundreds of people in many countries, more than 30 mayors, tribal leaders, and even governors and kings, who have expressed a keen interest in implementing OST in their towns.

OFFICIAL LAUNCH

The official announcement of the ONE SMALL TOWN initiative in Lebanon and South Africa, takes place on the 4th July 2022. From July 2022, all the necessary foundations need to be put in place, like onboarding members, business plans, logistics, and more, for the actual launch of the OST activity to funders and investors by October 2022.

Objectives:

- ✓ Unite the people in a simple vision and objective
- ✓ Identify the agricultural and industrial opportunities
- ✓ Rejuvenate communities with diverse industry and innovation that will provide work for everyone.
- ✓ Innovate the farming industry with the best technology and expertise possible to grow natural, healthy, organic food.
- ✓ Establish seedbanks of wide-ranging heirloom organic crops and plants
- ✓ Support the sharing of knowledge by Master Craftsmen and Elders
- ✓ Support the rediscovery of advanced healing methods and technologies
- ✓ Ensure the traditional healing plants do not become extinct.
- ✓ Support inventors, researchers, engineers in the development of many new technologies
- ✓ Support the development of an alternative education system that support a healthy educator-student relationship and real skills transfer
- ✓ Provide towns with self-supporting energy systems where possible
- ✓ Make our small towns as Investor-friendly as possible
- ✓ To present well developed, highly attractive business plans to investors.
- ✓ Offer truly secure and unique investment opportunities for investors because of our cooperative free labour force.
- ✓ To generate the best possible profits because of the cooperative free labour force, cheap components and ingredients, and many other benefits that ordinary businesses can never attain.
- ✓ To promote a culture of perpetual growth through reinvestment and community participation.

For a more in depth look at the ONE SMALL TOWN implementation plan, watch the ONE SMALL TOWN implementation crash course

For more details and up to date progress, visit the ONE SMALL TOWN official website for more information. <https://www.onesmalltown.org/>

THE CURRENT SOCIO-ECONOMIC SYSTEM

The current system is failing us all dramatically and it will not provide the solutions we need to solve the challenges we face. Albert Einstein said that “The definition of insanity is trying the same experiment over and over again using the same tools, but expecting different results.”

We have been trying the same socio-economic system for many years. It is very clear that it will not provide the solutions we are all looking for. We must try a new approach – find a new system that will bring lasting prosperity and abundance to our communities and benefit all participants.

OPPORTUNITIES ALL AROUND US

There are job creation opportunities all around us. Schools, factories, farms and warehouses, sports facilities and more are standing empty and deserted. These are all wasted opportunities that will be transformed and used for the benefit of our communities, under the **ONE SMALL TOWN** initiative.

HISTORY OF ABUSE AND EXPLOITATION

Historically, small towns are easy targets for large corporations who set up factories and large industries, and offer jobs. This only lasts while the large companies survive. When these companies close down, many people lose their jobs and the town suffers a severe economic blow that affects everyone. The ONE SMALL TOWN model will prevent this exploitative situation from ever happening again – WHY? Because the community will take ownership of many of the large-scale businesses in our own towns, while partnering up with conscious investors who recognize the wisdom in partnering up with an entire community.

A NEW APPROACH – TO PROSPERITY AND ABUNDANCE

The **ONE SMALL TOWN** strategy takes an entirely new approach towards reviving our towns and economies. It is a community-driven structure presenting a viable economic model that benefits all participants. A model that unifies entire communities towards a common goal, and fosters exponential economic growth potential.

The OST initiative will result in community-focused, financially abundant towns with maximum employment and new levels of security for investors and all its inhabitants.

SECTORS INVOLVED

The **ONE SMALL TOWN** strategy includes many of the major areas of industry and commerce. All these will become investment opportunities for conscious investors.

Agriculture	Food & beverage production
Healthcare	Tourism
Engineering	Technology
Nature Conservation	Specialized food growing
Pharmaceuticals & cosmetics	Building industry & housing
Education & training	Arts, Culture, Sports recreation
Seed banks	Electricity supply

HOW DO WE DO THIS?

COOPERATION & COLLABORATION

The ONE SMALL TOWN initiative belongs to the people of our community who choose to participate in the initiative. Participation is voluntary – but only those who sign up and participate will reap the benefits of our collective efforts.

A “Co-operative Company” has been registered in the name of ONE SMALL TOWN KURUMAN. All the people who are legal residents of the John Taolo Gaetsewe District, can sign up on the ONE SMALL TOWN KURUMAN website, and become instant members.

CREATING A POWERFUL LABOUR FORCE - CONTRIBUTION OF TIME

The ONE SMALL TOWN plan is based on large-scale community participation, in which members of the Kuruman Co-op each contribute **THREE hours per week** towards the businesses we start. We call this **CONTRIBUTIONISM**.

This **3-hours per week contribution generates** a powerful free labour force that can create, build or grow anything we choose to - as a community. We expect to sign up a around 70,000 people to this initiative in the Kuruman district. This will give the community 210,000 hours of free labour per week. We will be working as a united force towards creating prosperity for ourselves and our investor partners.

This will require many businesses to put all the people to work. In essence – we can create work for everyone in our community. This turns our community into a fierce competitor to any global monopoly, because of our cooperative free labour force.

MEMBERSHIP

Every person that signs up, becomes an instant shareholder and co-owner of all the many businesses we intend to launch. There is no payment or fee required to join and membership is voluntary. All that the members need to do is to pledge to contribute 3-hours per week to work in one of the businesses that they have become a co-owner of.

MANAGING THE BUSINESSES & OWNERSHIP

Each business is well planned, managed and operated by the best possible people, who have been appointed for their skills and expertise in every role. The businesses will belong collectively to the people (community) and the investors.

- 60% - The OST KURUMAN Co-operative (the people / members)
- 30% - The investors
- 10% - Ubuntu Planet - retained for royalties; intellectual property use; land use and more.

Highly experienced project managers are being appointed to oversee the launch and ongoing productivity of the businesses on behalf of the investors and the community.

BLOCKCHAIN TECHNOLOGY – NO CHEATING OR STEALING POSSIBLE

The projects will be managed by a centralized project management team, and a SMART Blockchain APP, that will allocate the people to the projects where they are needed. We will use the most sophisticated technology available to manage all this activity. This APP will also do all the calculations of profits from our businesses, allocation of payments and other benefits to all the members. All of this is completely transparent and visible to all members who have access to the APP.

HOW TO BUY OSTX TOKENS - INVESTOR REGISTRATION (XCHANGE & KYC)

Investors wanting to purchase OSTX tokens must register on our website to book tokens, on this page :

<https://www.onesmalltown.org/prelaunchtokenreserve>

Once a successful KYC process is achieved, investors will be able to buy as many tokens as they want. Tokens are sold at 1 USD each – there are 150 million tokens available in total – representing the full 30% share of the 24 businesses listed here.

DIGITAL WALLET: TIME-EQUITY

Investors will download a Digital Wallet from the CARDANO network. After a successful purchase of OSTX tokens, investors will be able to secure their tokens in their digital wallet hosted on the CARDANO blockchain. This digital wallet is only accessible by the investor and no one else.

NOTE : Before the ONE SMALL TOWN Digital Wallet is developed, we will be using Cardano native wallet. We recommend the use of Yoroi wallet, even though Daedalus and Nami are also possible choices.

<https://yoroi-wallet.com/#/>

<https://daedaluswallet.io/>
<https://namiwallet.io/>

TOKEN VALUE & ONGOING GROWTH

OSTX is valued at 1 USD (one US dollar) at its launch. Each OSTX represents a portion of 150 million tokens, that collectively own 30% of the businesses outlined in this document.

30% dividends/profits from these businesses will be held on behalf of the shareholders/OSTX token holders, in an escrow account. This account will grow monthly, and its increasing value represents the OSTX token value in the market.

Holders of the OSTX token are free to sell or trade the OSTX tokens at any time. Our trading platform is under development, and will offer a secure and safe way to exchange tokens between investors.

One third of the 30% profit, will be retained periodically to re-invest into new lucrative businesses that have been identified by the OST special management team, and promise a good return on investment. This gradual expansion and growth, will result in new business ownership, added to the original investment, and the constant increase in profits as a result of this growth, driving the value of the OSTX tokens.

BENEFITS TO ONE SMALL TOWN MEMBERS

In return for their contribution of 3-hours of time and labour per week, the members receive many benefits and profit-share from all businesses owned by the ONE SMALL TOWN Kuruman cooperative.

BENEFITS TO INVESTORS

Investors know how difficult it is to find safe and secure investment opportunities in the world today. Conscious investors who resonate with our plan and the unique investment benefits that do not exist anywhere else, will find the OST plan

highly attractive. It is our opinion that our ONE SMALL TOWN initiative will quickly become a highly sought-after investment destination for conscious millionaires.

Benefits to investors:

- Highly specialized management
- Large part of manual labour is a free labour force (bulk manual labour)
- Free electricity or very cheap electricity when applicable (once our electricity generators have been installed)
- No hostile competition from other players in the same business – because all the projects now belong to the people and investors.
- Everyone is on your side as the investor – to make the project a great success – because everyone benefits from the success.
- Free or very cheap components from the integrated projects, providing the components where possible. Like corn and wheat for food manufacturing and packaging; or milk for cream, butter and cheese production; or herbs for cosmetics and healthcare – and so on.
- Investors retain 30% (thirty percent) of the profits – a far healthier and secure return on investment than most opportunities in the world today.

OUR OWN SUPPLY OF ELECTRICITY

UBUNTU PLANET has access to new, green energy generating technology and water purification technology. We aim to install our own electricity generators to provide power to our entire district as soon as possible. The generators will belong to the ONE SMALL TOWN Kuruman Co-op collectively, so that no one can monopolize the power. The water purification will deal with all sewage and other pollution problems.

This will remove the dependency of small towns on the supply of these services, making these towns completely self-sufficient by providing their own electricity and clean water. Needless to say, this will bring substantial savings in the monthly expenses of such towns from existing service providers.

This will unlock endless potential and many opportunities in all spheres of our district and a good source of funding for the municipality.

BUILD-UP TO THE LAUNCH – LATE IN 2022

ANALYZING OUR INDUSTRIAL / AGRICULTURAL / BUSINESS POTENTIAL

We analyze the industrial, agricultural, and specialized business potential of our community. What crops are suitable for the climate; what sustainable building materials can be grown and manufactured. We see what farms are standing idle; what factories are empty; what warehouses are vacant and we identify the potential role they can play in reactivating our economy and creating abundance.

IDENTIFYING THE PEOPLE SKILLS AND ABILITIES

We perform a detailed analysis of our people, their skills and their abilities, to recognize where our community holds untapped potential. We capture these skills during our membership onboarding program. Then we match these skills to business potential we are creating. There are many skilled people in our communities that are not working because they simply cannot find a job. This initiative will create many new opportunities for all such people.

DEVELOP MANY BUSINESS PLANS

We have identified more than 200 businesses which will be prioritized for Kuruman. This white paper represents 24 of these businesses. The rest of the businesses will be offered to individual private investors who see the value in investing in these projects and partnering with an entire community.

WEBSITE & LAUNCH

At the time of our launch, expected in October 2022, our website will show the beauty and splendor of Kuruman, the people involved, present various videos and interviews with the people, and show the many sites identified for the various businesses. The website is the brochure for our OST initiative. We will feature the many business plans and allow investors to choose the investment of their choice. The official launch of ONE SMALL TOWN KURUMAN will take place on a specific date and time when we make our website go live on the internet.

FUTURE GROWTH POTENTIAL – RE-INVESTING IN OUR COMMUNITY

Once the first cornerstone projects have been established, our community will no longer require any outside investment as we will be generating enough income from our own community run businesses to fund all future growth.

This cycle will keep expanding and allow us to start more and more businesses, keep upgrading our own facilities like roads, parks, hospitals, schools, old age homes and more. We will be able to develop vibrant tourism, cultural, artistic activities and sporting events.

We trust that this realization will create a wave of conscious investors to grab the opportunity before there are no more investment opportunities available. There are millions of investors, but only a limited number of small towns in each country.

It is quite possible that the ONE SMALL TOWN initiative will become the next investment rush around the world, as conscious, wide-awake investors cause a stampede to find the next small town to invest in, before someone else does. Some small towns will only require one or two large investors to create a successful model.

ANTICIPATED MEMBERSHIP – POWERFUL LABOUR FORCE

We expect an initial 70,000 members to sign up for their 3-hours per week contribution in Kuruman in 2022. This is according to feedback from the mayor after her assessment of the initiative. This will give the community and investors 210,000 hours of FREE labour every week, in the businesses we start. An unrivaled benefit that no international corporation can compete with. This is one of the main reasons why we expect substantially higher profit yields than other businesses.

SMART CONTRACT

Smart contracts will be used extensively throughout the ONE SMALL TOWN ecosystem therefore a robust smart contract blockchain solution is developed.

ECOSYSTEM

- ✓ The entire ONE SMALL TOWN ecosystem will operate on the Cardano blockchain at first, while the UBUNTU blockchain is developed.
- ✓ The consensus model will require a blockchain application for secure voting.
- ✓ The transparency of the blockchain will ensure accountability and effective time and resource management of the many projects.
- ✓ The blockchain provides a robust solution for OST requirements of an extensive member profile, to identify unique skills, and personal qualifications, and completed training requirements to contribute at different businesses in the community.
- ✓ The level of training attained will be recorded on the blockchain per individual. This will ensure that no one will be asked to perform work they are not qualified for – where such qualifications are required. Large component of the labour in the OST model is basic unskilled labour, which helps the countries with high unemployment among the poorest of the poor.
- ✓ The blockchain will record in real time the products and services popularity and demand. This will ensure timely tracking of resources to best serve the desires and needs of the members.
- ✓ The blockchain provides a reliable system that allows business ordering of goods, ingredients, services – tracking of distribution to OST members, retailers, exports – tracks operation costs and profits, and much more.
- ✓ A robust platform is already in place to sustain the supply chain demands between the many ONE SMALL TOWNS as we grow.

TOKENOMICS (Co-operative Company share)

60% - The OST KURUMAN Co-operative

30% - The investors (150 millions tokens)

10% - Ubuntu Planet NPC (royalties, IP, rentals, management fees)

2022 ROADMAP

✓	Q1: ONE SMALL TOWN Investor token created
✓	Q1: ONE SMALL TOWN website
✓	Q1: Phase 1 International Office
✓	Q1: ONE SMALL TOWN implementation plan
	Q2: Digital Wallet ready for download
	Q2: Smart contracts for registration
	Q2: Time-Equity wallet ready to receive tokens
	Q2: Member's Registration opens
	Q2: OST Investor tokens sale
	Q3: Kuruman Official Launch
	Q4: Businesses opening

SOUTH AFRICAN INSPIRATION - KURUMAN

On Wednesday, 23 February 2022, the town of Kuruman became the first South African municipality to embrace the ONE SMALL TOWN plan. This includes the entire John Taolo Gaetsewe District Municipality that covers more than 27,000 square kilometers, population of approximately 300,000. This provides us with an unprecedented opportunity for large scale agricultural projects and extensive industrial and manufacturing activity.

We are actively working on over 200 business plans for the launch of OST Kuruman. These businesses cover many critical sectors of our economy like agriculture, manufacturing, healthcare, pharmaceuticals, energy, water purification and desalination, education, building materials, food production, and many more.

We expect a minimum of 4 more South African municipalities to adopt the OST model in 2022 with a total population of approximately 500,000 people. We are anticipating that 70,000 or more residents will register in South Africa in 2022. This can grow to 1 million members by end of 2023.

Furthermore, there is a very serious interest from several traditional leaders in South Africa, among which is the largest group with over 15 million people, and over 2,5 million hectares of land, who has requested a presentation and is looking to the ONE SMALL TOWN plan as a solution for the socio-economic strife among their people.

ONE SMALL TOWN KURUMAN - 24 BUSINESS PLANS

We have identified two main projects each with a number of businesses as part of Phase 1 for Kuruman, and used the following criteria for selection purposes.

- Immediate Local Need and Job creation
- Familiarity and
- Adaptability of products and projects to the communities in question
- Turn Around time to revenue generation
- Local and neighboring markets
- High Profitably Index

The two projects are as follows with their respective 24 businesses in total that are part of the offer to investors through the OSTX tokens. This white paper outlines the environment in which these businesses operate, the people who work them, technology, and the unlimited potential for growth. The 150 million OSTX tokens on offer, in this white paper represents a 30% stake in each of these businesses collectively.

PROJECT 1: AGRICULTURE

The businesses selected in the agricultural sector includes all activities within the value chain for both Crop and Red Meat production to ensure food security in the region. Historically the farmer would specialize in a segment of the value chain

and sell on to agents or central Co-Ops to then sell on to the rest of the value chain. We have made this all-inclusive, cutting out the middleman and diversifying as far as we possibly can to ensure affordability and true value for our people. From the Farm, to your Plate.

CROP PRODUCTION

The following 3 Crops have been identified and each treated as a separate business

Crop Type	Season	Hectares
Maize	Summer	4 500
Barley	Winter	3 500
Wheat	Winter	1000

CENTRALIZED AGRI EQUIPMENT HUB

All equipment required for planting, maintaining and harvesting will be managed and maintained centrally and will provide services to all the One Small Town farms and existing farmers in the area.

GRAIN HANDLING AND STORAGE PLANTS

Silos and drying towers for the safe storage and treatment of all crops harvested aligned to tonnage profiles of the One Small Town crops and spare capacity provided for existing farmers in the area.

MILLING

We will establish two milling plants in close proximity of our Silos and will be managed as two separate businesses.

Mill Type	Production Tons/Day	Product	Yield	Used for
Maize	20	Maize Meal	70%	Porridge
		Chop	30%	Livestock Feed
Wheat	2	Wheat Flour	70%	Bread and cereals
		Bran	30%	Livestock Feed

- Milling
- Bagging and packaging
- Distribution to Warehouses and diversified One Small Town Businesses

DIVERSIFIED BUSINESSES – CROP PRODUCTION

Businesses as an output of the crop production value chain

- One Small Town Warehouses for bulk sales to shop owners and members
- Bakery
- Livestock Feed manufacturing plants
- Hydroponic Barley sprouting units for feed production of livestock
- Brewery for our own Kuruman Beer

COMMERCIAL CATTLE FARMING

There are currently a big number of subsistence commercial cattle farmers in the area that we will be supported by the centralized Livestock Hub.

- Existing farmers will be provided with animals with good genetics to improve the genetics of their herds.
- Off take for their animals as part of the value chain
- We will have 5,000 head of our own cattle as per allocated land provided by the paramount Chiefs

LIVESTOCK FEEDLOTS

The supply of weaners will come from the local subsistence farmers and farmers from surrounding districts and our own weaners from our commercial herds

- 5,000 background weaners
- 20,000 head of cattle standing in the feedlots at any given time
- No hormones will be used during the feeding process as part of their rations.
- Sprouted Barley will make out the biggest part of their diet, which is a natural product high in protein and energy, reducing the risk of internal stress, bloating and disease.

- The sprouted barley also increases the marbling in the meat making it very healthy in comparison to the commercial feedlots out there.

ABATTOIR

All animals fed and reared in our feedlots will go to our Abattoir for slaughter. This will be a world class facility with export licenses

- 200 units per day

RED MEAT PROCESSING AND PACKAGING PLANT

World class facilities to support clean healthy processed meat products

- 75% of the carcasses will be De-Boned and processed into Primals and Final cuts ready for our Warehouses, members and the international market.
- The 5th quarter, which is the intestines and heads will be cleaned and packaged for market

DIVERSIFIED BUSINESSES – CATTLE FARMING

Businesses as an output of the Red Meat Production Value Chain

- One Small Town Warehouses for bulk sales to shop owners and members
- Gelatin Plant: the bones and parts of the skin are used to manufacture food grade gelatin for the food industry
- Leather Tannery: All the skins will be processed at the tannery and distributed to our leather manufacturing products plants
- Alkaline Hydrolysis Fertilizer plant: The condemned material from our abattoir and Processing plant will go through this process to produce a super Phosphate fertilizer used as fertilizer for our crops

FINANCIAL HIGHLIGHTS FOR OUR AGRI BUSINESSES

The combined requirement for the project is highlighted below. It is important to note that the businesses listed above are combined to form a unit ensuring fair value and margins to all in the value chain

Description	Financials
Investment required	\$ 91 310 788,00
Annual turnover	\$ 253 998 890,00
Gross Profit	20%
Net Profit	12%
ROI: Return on Investment	30%
IRR: Internal Rate of Return	11%
Profitability Index	1,12

PROJECT 2 - MEDICINAL PLANT PRODUCTION

South Africa is known for its medicinal plants and has the third biggest variety in the world after China and India but only supply 1% of the total Global requirement

The following five businesses make out the total value chain for the manufacturing of Medicinal products - and again has been incorporated to form a unit as per the Agricultural Project.

CROP PRODUCTION

All crops will be under irrigation and the relevant net housing to protect it from the elements. Each is treated as a separate business seeing that the difference in planting, maintenance and especially harvesting protocols are so different.

Crop Type	Season	Hectares
Bulbine	Perennial all year	200
Devils Claw	Winter	50

PROCESSING AND EXTRACTION

The process for each is different and we will have the processes fitted to world standard as to extract the optimal from the plant material

- Cold-press for the extraction of the Bulbine Gel
- Press and Mill for the production of Devils Claw products

MEDICINE LABORATORIES

All products will be formulated to international standards for the production of medicinal products and packaged to be distributed to our warehouses, exports and members.

FINANCIAL HIGHLIGHTS FOR OUR MEDICINAL PLANTS

The combined requirement for the project is highlighted below. It is important to note that the businesses listed above are combined to form a single unit, ensuring fair value and margins to all in the value chain.

Description	Financials
Investment required	\$ 22 840 438,80
Annual turnover	\$ 67 000 000,00
Gross Profit	97%
Net Profit	68%
ROI: Return on investment	199%
IRR: Internal Rate of Return	100%
Profitability Index	6,9

Full details of these businesses including the business plans are available for investors upon registration on the Xchange platform and approved KYC.

OST WEBSITE

A dedicated ONE SMALL TOWN website provides all the insights and information available about the OST initiative, the objectives, the details, documents, videos, history, the people behind it and the growing number of participating towns. ONE SMALL TOWN Website (www.onesmalltown.org)

SOCIAL MEDIA CAMPAIGN

Various social media pages were launched in 2022 to assist with communications, marketing, increasing both awareness and web traffic. Michael Tellingier is regularly interviewed by a variety of podcasters. One in particular, is a great supporter of ONE SMALL TOWN, and has an audience of over 18 million.

Using these channels to promote One Small Token will be advantageous. There is an ongoing stream of interest from various hosts of podcasts and other channels to interview Michael Tellingier. This interest will be maximized.

GLOSSARY

Blockchain

A shared, immutable ledger that facilitates the process of recording transactions and tracking assets in a business network. An asset can be tangible (a house, car, cash, land) or intangible (intellectual property, patents, copyrights, branding).

Cryptocurrency

A cryptocurrency is a form of digital asset based on a network that is distributed across a large number of computers. This decentralized structure allows them to exist outside the control of governments and central authorities.

Digital Wallet

A software application that allows one individual to make electronic transactions with another individual using a digital currency to trade or exchange good and services.

Smart Contract

Smart Contracts are self-executing contracts with the terms of the agreement between buyer and seller being directly written into lines of code. The code and the agreements contained therein exist across a distributed, decentralized blockchain network.

Token

Tokens are digital units of value on a blockchain that are tied to some form of asset. Tokens can represent anything, for example stocks, IP rights, coins, credibility points, or special access to a service or a feature.

Tokenomics

A catch-all for the elements that make a particular cryptocurrency valuable and interesting to investors. That includes everything from a token's supply and how it's issued to things like what utility it has.

LEGAL DISCLAIMER

Nothing in this White Paper is an offer to sell, or the solicitation of an offer to buy, any tokens. ONE SMALL TOWN is providing this White Paper primarily to solicit public input and comments. Nothing in this White Paper should be construed or interpreted as a guarantee or promise as to how the ONE SMALL TOWN business or tokens will evolve, or as to the tokens' utility or worth. This White Paper covers current goals, which ONE SMALL TOWN reserves the right to change at any time, and the success of which will be determined by a variety of factors beyond ONE SMALL TOWN control, such as market-based factors and factors in the data and cryptocurrency industries, among other things. Any predictions for the future are exclusively based on ONE SMALL TOWN examination of the concerns raised in this White Paper. That assessment could turn out to be inaccurate.
